Vessel Loss of Propulsion, Coast of Los Angeles County, Hazardous Materials Spill Report: 18-2910

On 05/05/18 at 0254 hours, the California State Warning Center (CSWC) received a report from the National Response Center (NRC) that a vessel (Bulk Carrier Foochow – Singapore) off the coast of Los Angeles County had lost main propulsion while performing pre-arrival checks; a requirement of all vessels coming into port in the United States.

- The crew shut down the main engine to troubleshoot and fix two mechanical issues.
- The vessel was not in danger and retained the ability to restart the engine and maneuver if necessary.
- Onboard cargo included 996 tons of vessel fuels and 23,000 tons of solid petroleum coke.
- United States Coast Guard (USCG) was monitoring the situation and prepared to respond in the event the vessel needed assistance.
- CSWC made notifications per SOP.
- As of 05/05/18 at 0554 hours, the vessel was operating on its own power and was proceeding safely to the Long Beach Anchorage (ANCH).

WEATHER OF CONCERN

Weather of Concern

- As we head into a warm weekend and the snowpack continues to melt, remember that water in area rivers and streams is quite cold and can be running very swiftly.
- Excessive Heat Warnings are in effect through Sunday evening in southeast California.

WEATHER SYNOPSIS BY REGION

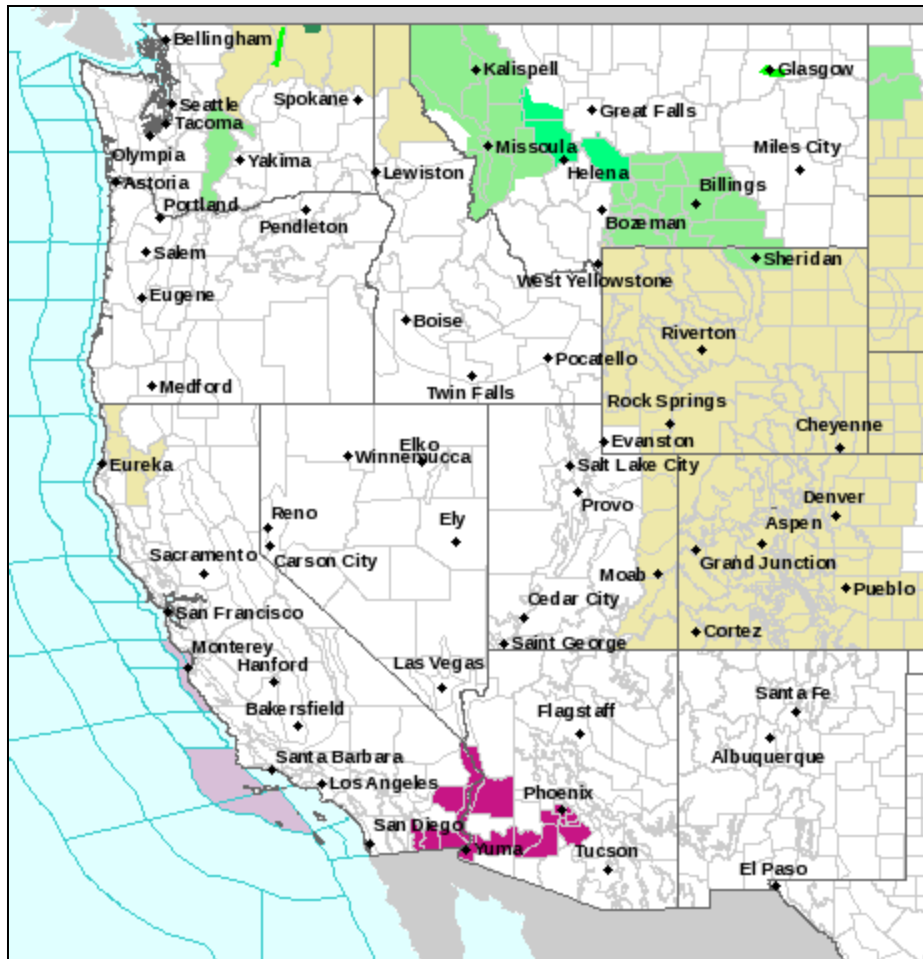

NORTHERN CALIFORNIA

An upper level disturbance may bring scattered showers and isolated thunderstorms to the interior portions of northwest California today. A low pressure system will then track into the Pacific Northwest which could bring a few more showers on Sunday with drier weather then expected on Monday. Another system could bring additional chances for rain midweek.

SOUTHERN CALIFORNIA

High pressure aloft will continue very warm weather again today away from the immediate coast. The warm conditions will continue over the mountains and deserts through Sunday, while slow cooling spreads inland from the coast. Above normal temperatures are expected to prevail through at least early next week. Overnight coastal low clouds are expected to develop along much of the coastline Sunday night and continue through next week.
